INSTRUMENT MANAGER 2.0

APP FOR MANAGING THE INSTRUMENT PARAMETERS

LAUMAS®

The Instrument Manager 2.0 app allows you to manage the setting of parameters, updating and monitoring of Laumas weight indicators and weight transmitters via PC, smartphone and tablet. Refer to the data sheet of the desired instrument to verify its compatibility.

The connection is made via Bluetooth.

Available for Windows and Android (iOS in development).

MULTILANGUAGE SOFTWARE

CONFIGURATIONS

- Through Instrument Manager 2.0, you can create a complete configuration for the connected instrument by setting the values of all the functional parameters. You can create and save multiple complete configurations and send or upload them later.
- By saving the configurations within the software, you will be able to recover them quickly and easily.

MONITORING

- Real-time monitoring of the weight read by the instrument to analyze the pattern in relation to setpoint, stability and digital inputs/outputs.

REAL CALIBRATION

- Calibration of an instrument through sample weights: the procedure is guided by an interface that shows in real time the weight read by the instrument and any corrections made by the user.

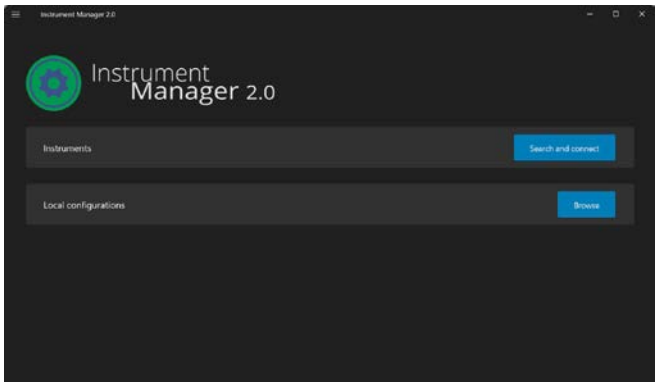

AUTOMATIC FIRMWARE UPDATE OF THE INSTRUMENT

- Instrument Manager 2.0 allows you to update the firmware of the weighing instrument by automatically downloading from the internet the new firmware distributed by Laumas. In this way, the instruments will always be updated to the latest versions.

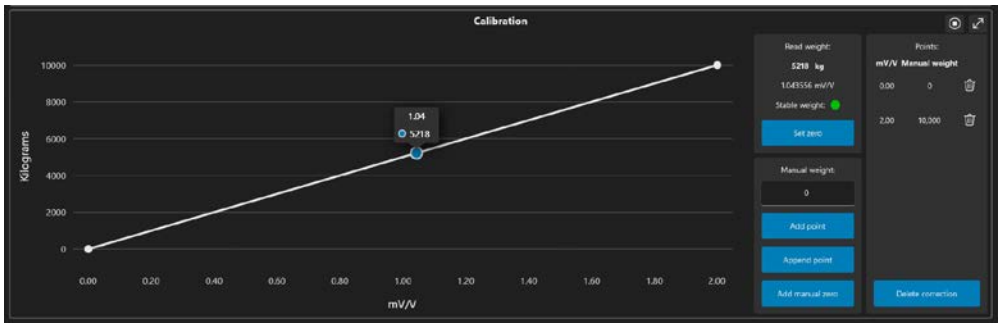

QUALIFIED ACCESS TO LEGALLY RELEVANT PARAMETERS

- Instrument Manager 2.0 allows simple management of legally relevant parameters for approved instruments, keeping them protected from unauthorized access.
