MOUNTING KIT for BENDING BEAM load cells

LAUMAS®

DIMENSIONS AND TECHNICAL SPECIFICATIONS

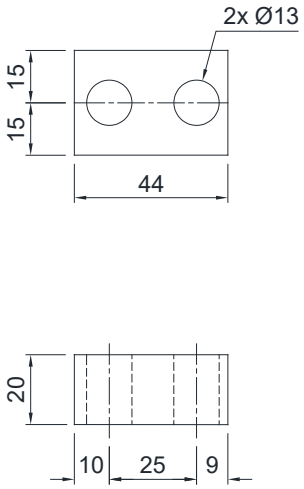

- During the transport and installation the lock (*) must touch under the load cell. After installation, move the lock away from the load cell.
- Connect the structure to be weighed by means of copper wire, then connect all the lower plates to the earthing system.
- In case of structure with four-point support, if one-point does not touch the upper part of the mounting kit, you must proceed to insert a shim before fixing the bolts.
- For the load cell fixing screws (•), provide a tightening torque of 50 Nm.
