LAUMAS®

Q What solution do you suggest to make the best use of **COD digital load cells** in a weighbridge?

A The best solution is the advanced one, in which the COD digital load cells are connected to a weight indicator with **BGE weighbridge software** (available for WINOX – BGE and WTAB-BGE instruments).

Options are also available on request such as an integrated or external printer and remote displays.

Q Among your solutions, are there **multi-module** weighbridge **systems** to determine the weight on each axle and the total weight of the vehicle?

A **No**, at the moment this is not an available option, but we are working on including it in our weighbridge solutions.

Q If I order more than one **COD digital load cell**, is the **cable** for connecting them together included?

A **Yes**, with COD digital load cells, the **dual connector** connection cable is also **included**.

The cable with **only one connector**, for connecting the digital load cell to the weight indicator, is available on request.

Q Can **COD digital load cells only** be connected to LAUMAS weight indicators with **BGE software**?

A **Yes**, the COD digital load cells interface only with **weight indicators with BGE software**, such as WTAB-BGE and WINOX-BGE.

Q Are COD digital load cells mechanically **compatible** with **COK** analog load cells?

A **Yes**, the COD digital load cells have been specially designed to **replace** the COK analog load cells, with no need to modify the structure of the weighbridge.

Q Is the **instrument calibration** procedure different if I use digital load cells instead of analog load cells?

A **No**, using digital load cells does not alter the calibration process. The two possibilities offered by LAUMAS instruments are always practicable: **theoretical calibration** and calibration with **sample loads**.

Q Among your weighbridge weight indicators, is there one that can handle **multiple languages?**

A **Yes**. Our WINOX-BGE and WTAB-BGE weight indicators are equipped with **multilingual software** and handle up to **5 languages**: Italian, English, French, Spanish and 1 language of your choice.

For the language of your choice, you can set both the text of the messages and the alphabet to be used.

Q Can **radio frequency identification** (RFID) and **position detection** systems be installed on the PROG WBRIDGE software?

A The standard version of the software does not support neither RFID readings nor the management of position detection systems.

On request, we can **modify the software** to implement RFID reading and the management of position detection systems.
